

ABOUT THE CAMPAIGN

**RIGHT NOW, WE ARE
IN THE MIDDLE OF A
HOUSING CRISIS.**

Every-day people are facing soaring rent prices and rising interest rates. Families are applying for rental property after rental property, as they are forced to compete with so many others in the same situation.

CONFRONT THE CRISIS

Real housing action **NOW**

THE FACTS

There just aren't enough **affordable** rental homes. That's why we need **urgent investment** in community housing from the NSW Government and others, to be delivered and managed by not-for-profit community housing providers.

This will **cut the social housing waitlist**, provide **long-term secure homes** for families on low-incomes, take the pressure off the private rental market, and reduce the risk of **homelessness** for thousands of people. We can begin to fix the problem.

Rental prices

Vacancy rates

Vacancy rates for rental homes in NSW are at a record low of 1.2%. Rental prices have risen by over 10% in the last year.

50,000

individuals and families are on the **social housing waiting list**. People are waiting for a decade to secure housing

The University of Sydney found for every \$1 dollar invested in social housing, there is a \$4.80 return

The number of older women who are homeless across Australia increased by 55% in the last decade.

Almost 5,000 women over the age of 55 on the waiting list for social housing in NSW.

Investing in community housing works.
It's a win for NSW families and a win for the economy.
